

Pablo López Fernández

(+34)619139576 | pablolopez161616@gmail.com | Madrid, Spain

EDUCATION

Universidad Politécnica de Madrid | Bachelor of Computer Science · Madrid, Spain | Sep. 2021 – July 2026

- Key Skills: Teamwork, research collaboration, data analysis.

WORK EXPERIENCE

LoxamHune | Software Engineering · Madrid, Spain | Nov 2024 – Present

- Microsoft Dynamics 365 Business Central (AL): Customization and development to improve business processes (invoicing, customers, vendors, roles, permissions, and reports).
- Cloud Engineering: Design and implementation of cloud-based solutions using Microsoft Azure, including serverless components with Azure Functions for application logic and automation.
- Cloud Monitoring, Storage & Networking: Monitoring and logging with Azure Application Insights, management of data using Azure Storage (Blob, queues), and configuration of virtual networks with Azure Virtual Network.
- DevOps & Version Control: Source code management with Git and GitHub, work item tracking, repositories through Azure DevOps.

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services | Expedicion: oct. 2025
- HashiCorp Certified: Terraform Associate (004) – HashiCorp Terraform | Expedición: feb. 2026
- II Hackathon URJC – Universidad Rey Juan Carlos | Expedición: mar. 2025

PROJECTS

Unified Calendar Integration Using a Serverless Architecture and Automatic Deploy

- A system to merge, filter, and transform events from different calendar services into a single standardized calendar.
- Built on a modular, serverless architecture in AWS, supporting formats like ICS/WebCal and APIs such as Google Calendar API, and deployed automatically using Infrastructure as Code (Terraform).

DevOps Technical Assessment – S3 API with LocalStack, Terraform and CI/CD

- End-to-end DevOps project implementing a REST API (Python) that interacts with an AWS S3 bucket emulated locally via LocalStack, allowing listing and uploading of JSON objects.
- Infrastructure provisioned with Terraform (HCL), containerized with Docker and Docker Compose for local orchestration of the API and LocalStack services.
- CI/CD pipeline configured with GitHub Actions to automate Terraform validation, plan, and apply stages on every push.

DIGITAL SKILLS

DevOps: Linux | Ansible | Docker | Bash

Programming: Java, C/AL, C#, Python, REST APIs

Infrastructure as Code: Terraform

Cloud Computing: AWS, Azure

Version Control: GitHub, Git

Monitoring: AWS CloudWatch, Azure Application Insights

Serverless: AWS Lambda, Azure Functions

LANGUAGE SKILLS

Spanish: Native proficiency

English: Professional working proficiency (B2)

German: Limited working proficiency (A2-B1)
